**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-28</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-28</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-28</u>	YES
	Claims <u>NONE</u>	NO

**2. CITATIONS AND EXPLANATIONS**

Claims 1-28 meet the criteria set out in PCT Article 33(2) and (3), because the prior art does not teach or fairly suggest the invention of the instant claims. While several of the polypeptides of the claims were known in the art at the time of the invention, the prior art failed to establish that the binding of said polypeptides would provides an effective treatment for a diabetic, or prediabetic individual.

Claims 1-28 meet the criteria set out in PCT Article 33(4), and thus establish industrial applicability because the subject matter claimed can be made or used in industry.

**VIII. Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 1-28 are objected to as lacking clarity under PCT Rule 66.2(a)(v) because the invention of the claims is not fully supported by the description. The description does not disclose the claimed invention in a manner sufficiently clear and complete for the claimed invention to be carried out by a person skilled in the art because: The disclosure fails to establish that the binding of the polypeptides of the claims would provide an effective treatment for a diabetic, or prediabetic, individual.
